March Tourism Update

Mar 2025

Snapshot

- Despite March dip due to Ramadan, AD saw strong growth in international visitors and hotel revenue vs Q1 2024. Growth was driven by India, Russia and UK.
- A notable decline of visitors from key source markets (France, Germany, China) coincided with a reduction in airline seat capacity serving these countries, driven by continued exodus of foreign airlines from AD, with foreign airlines citing low yields and operational challenges.

Abu Dhabi continues to expand its routes..
